

## Introduction, administrivia

Data Structures and Algorithms for Computational Linguistics III  
ISCL-BA-07

Çağrı Çöltekin  
/çac/w tjeltec/in/  
ccoltekin@fsfs.uni-tuebingen.de

University of Tübingen  
Seminar für Sprachwissenschaft  
Winter Semester 2022-2023

version: 03.08b-2022-03-18

## What is this course about?

- An intermediate-level course on programming
- Algorithms: (good) solutions to programming problems
- Data structures: (efficient) ways to organize/store information

### Prerequisites:

- Data Structures and Algorithms for CL I
- Data Structures and Algorithms for CL II

Module: ISCL-BA-07, Advanced Programming

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 1 / 9

## What is in this course?

A bird's eye view

### Introductory lectures on

- Some fundamental data structures: arrays, queues, stacks, trees, ...
- Some fundamental algorithms: searching, sorting, pattern matching, graph algorithms
- Analysis of algorithms
- Finite state automata
- Parsing

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 2 / 9

## Why study algorithms?

- It is one of the fundamental topics in computer science: an algorithm is the way you instruct a computer to do things
- Knowing a clever, efficient solution to one problem helps designing good solutions for other, related problems
- Learning basic algorithmic techniques makes you a better programmer
- Designing good algorithms is an intellectual challenge
- The most popular interview questions for programming jobs are about algorithms

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 3 / 9

## Course overview

- Lectures (VC 0.01)
  - Monday 14:15-15:45
  - Wednesday 14:15-15:45
- Lab: VG 0.02, Friday 14:15-17:45
- Tutors:
  - Jakob Schmitter
  - Daniela Verratti-Souto
- Public course website: <https://dsac13-2022.github.io/>
- Moodle: <https://mooodle.zdv.uni-tuebingen.de/course/view.php?id=2833>
- GitHub: <https://github.com/dsac13-2022/dsac13>

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 4 / 9

## Literature

- **goodrich2013**, **goodrich2013** (**goodrich2013**)
  - Available through university library (online version): <https://ebookcentral.proquest.com/lib/untueb/detail.action?docID=6946360>
  - Website of the book contains source code, hints, examples: <http://bca.wiley.com/bw-bca/Books?action=index&bcId=8029&itemId=1118290275>
- **Jurafsky2009**, **Jurafsky2009** (**Jurafsky2009**)
  - Draft chapters of 3rd edition is available at <https://web.stanford.edu/~jurafsky/slp3/>
- Course notes will be provided for some topics

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 5 / 9

## Coursework and evaluation

- Reading material for most lectures
- Weekly assignments: ungraded, but **required**
- Final (written) exam (70%)
- Final project (30%)
- Attendance is not required, but you are unlikely to pass without regular attendance

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 6 / 9

## Assignments

- Assignments in Python
- Only online submissions through GitHub
- The assignments can be done in pairs (strongly recommended – knowing your classmates, and learning from them, is an important part of the university experience/education)
- This means **working together on the whole exercise**, not sharing parts of an assignment and working on them independently
- You can pair with the same person only once
- We will have a match-making mechanism
- See course page for more information

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 7 / 9

## Topics at a glance

- A recap of what you should already know: arrays, lists, maps, queues, stacks, iteration, recursion, binary search, ...
- Algorithmic analysis
- Common algorithmic patterns: brute force, greedy, divide and conquer, dynamic programming, ...
- Sorting
- Trees
- Priority queues, heaps
- Hashing
- Graphs, graph algorithms
- Pattern matching
- Tries
- Finite state automata and regular expressions
- Finite state transducers
- Parsing

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 8 / 9

## Final remarks

- Please do not be shy, ask your questions during the lectures
- Please take the assignments seriously, learning programming requires practice
- Next:
  - a recap of basic data structures and algorithms
  - a Python tutorial (?)
- Time for your questions

C. Çöltekin, WS | University of Tübingen

Winter Semester 2022-2023 9 / 9

## Acknowledgments, credits, references

- Some of the slides are based on the previous year's course by Corina Dima.
